

Project Future – Direct Beneficiary Transfer (DBT)

Date Completed: 19th August 2022

Project Title: Project Future – Direct Beneficiary Transfer (DBT)

Funding Organisation: Tarachand Ramnath Seva Trust (TRUST)

Implementing Organisation: MASHAL (Maharashtra Social Housing and Action League)

Introduction and Objectives:

The key purpose of this project was to introduce government social security schemes as per beneficiary eligibility and support house hold to process application to those families who's children lost their one or two parents. Total 150 beneficiaries are availed with different govt. schemes as per eligibility.

The project started on 1st April 2022 and finished on 19th August 2022.

Specific project goals included:

- Verify & validated eligibility for DBT for 150 HH affected by COVID within the PMC area.
- Supported 150 HH for the application process to relevant govt. social security/ welfare schemes.

Key activities:

- 1) 150 Beneficiary assessment
- 2) 150 Beneficiary identification & verification
- 3) 150 Beneficiary screening through Haqdarshak app
- 4) Introduces govt social security and welfare schemes to beneficiary as per eligibility
- 5) Supported 150 HH for the documentation & application process to relevant govt. social security

Key Outcomes:

Identified and selected all 150 beneficiaries are aware about 20 govt social security, welfare and ULB welfare schemes in targeted area. Motivated all selected beneficiaries for schemes application process and enrolment.

Key Highlights:

In this project 83% widow women beneficiary was identified and selected for the DBT. In 152 selected families 258 children were identified & lost their parent. Out of the 20 schemes introduces 73% families were benefited state govt. scheme of “Sanugrah Anudan (Rs. 50,000)”.

Key Issues:

At the time of project started most of the families were affected by COVID before past two years. Covid affected and scheme awareness duration gap was over 2 years. So, all of the beneficiaries started their routine life normally. Some of beneficiaries was not positive attitude towards welfare schemes benefit. Some beneficiary was financially strong. At the time of beneficiary screening process for schemes introduces technical error were arises.

Community and organisational feedback/acceptance on project:

Positive feedback has been provided by beneficiaries to the Project future- DBT. The majority of positive feedback was received from needy families in the project area. They were understood very well application process and documentation process through this project.

Recommendations:

To develop a positive relationship with government officers in concern department to save time and resources, for that beneficiary who were applied different welfare schemes but still not benefited. ‘Balsangopan Yojana’ is the important scheme for the covid affected children. Encourage those eligible families for enrolment of ‘Balsangopan Yojana’ who are eligible but application not processed. Increasing no. of enrolment of ‘Balsangopan Yojana’ will help improved project impact.
